INITIAL SERVICE PERIODS
AND TERMINATION OF SERVICE

B. TERMINATION OF SERVICE

1. Termination of service may be arranged for prior to the expiration of the initial service period, upon notice being given to the Telephone Company five days in advance, and upon agreement to pay all charges due for service furnished plus any termination charge. (T)

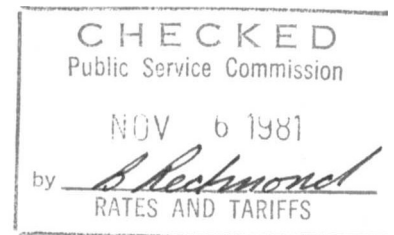

In the event a portion of an installation is discontinued, the application of termination charges will be based on the premise that the items of equipment discontinued were the last such items installed.

Termination charges do not apply when private branch exchange service is replaced by Centrex service where the location of the replaced private branch exchange equipment becomes the Primary location of the Centrex system.

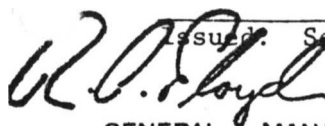

Termination charges do not apply when existing service is replaced by ESSX-1 service where the existing service's intercom switching system is provided by the same No. 1 ESS central office equipment which becomes the intercom switching system for the ESSX-1 service.

The service period is not terminated when service and facilities are relocated within the same continuous property, and the customer pays the charges specified for such type of relocation. (T)

The service period is not terminated when service and facilities are moved to different premises anywhere within the operating area of the Company (includes exchanges in Ohio, Kentucky, and Indiana) on a lapse-in-service basis as specified in Section 34 of this tariff.
